AMBER, EU KHARN YEE

Backend Technical Leader

ambereu.work@gmail.com | LinkedIn | Portfolio

Backend technical leader with 8+ years of software development experience across varied business domains. Combines hands-on engineering with end-to-end technical ownership: translating business needs into practical solutions, aligning product and engineering teams, and guiding complex work from requirements through release. Adaptable to new domains, with the ability to build domain knowledge quickly and apply it to reliable, maintainable software.

Technical Skills

- Languages: Python, TypeScript, JavaScript, C#
- Backend: FastAPI, Express.js, ASP.NET
- API Design: REST, OpenAPI 3.0
- Messaging and real-time: Kafka, RabbitMQ, WebSocket, FIX
- Databases: PostgreSQL, MySQL, MongoDB, Microsoft SQL Server
- Frontend: Angular, Tailwind CSS, Bootstrap, HTML5, CSS3
- Tools: Docker, Git, Azure DevOps, Figma

Experience

Backend Technical Leader | CFI Financial Group

Remote | May 2025 — Oct 2026

Promoted from Backend Developer (Oct 2024 — May 2025)

- Backend technical lead and go-to person across Crypto and Payments, bringing product and engineering teams together to turn business goals into clear technical scope and coordinated delivery.
- Partner with product owners, stakeholders, business and system analysts, architects, frontend and mobile engineers, and QA to clarify requirements, align APIs and dependencies, resolve delivery gaps, and prepare releases.
- Lead a geographically distributed team through technical analysis, task breakdown, code review, mentorship and delivery planning.
- Crypto digital asset product: Integrated liquidity provider connectivity over FIX using QuickFIX to retrieve live market prices and place orders; implemented WebSocket broadcasts to deliver real-time prices to the frontend.
- Payments product: Lead third-party PSP integrations for payment methods, coordinating provider communication, technical requirements, testing and cross-team readiness to bring integrations into production.
- Designed extensible backend architecture for payment integrations and delegated implementation work; delivered integrations involving Checkout.com and Praxis to enable deposits and withdrawals for verified users.
- Also contributed to Bridge Monitoring and Introducing Broker Portal systems, including real-time Kafka data flows, production issue resolution and API alignment.

Software Engineer | Yell Research Sdn. Bhd.
Remote | Aug 2021 — Sept 2024

- Involved in the development of Content Service (CS), Digital Media Centre (DMC) using Angular 12, NodeJS and ExpressJS.
- Contributed to the development of AI assist applications, enabling semantic search and document querying using Python and FastAPI.
- Authored Open API specifications using OpenAPI 3.0 to promote standardized communication and documentation, ensuring seamless integration.
- Designed mockups and prototypes using Figma to provide visual representations aligning project outcomes with stakeholder expectations.
- Ensured an optimal user experience by implementing responsive layouts for mobile and tablet devices.
- Actively participated in code reviews to maintain adherence to coding conventions and quality standards.

Software Engineer | Kerry Logistics Network
Penang, On site | Jan 2019 — Jul 2019
Promoted from Junior Software Engineer (Dec 2017 — Dec 2018)

- Developed Billing system and Web EDI system using ASP.NET C# MVC and MySQL.
- Developed Point Of Sales system for ABX Express using WPF and MsSQL.
- Led the design of database schemas and oversaw the system development life cycle.
- Prepared unit tests using NUnit and Moq mocking framework.
- Streamlined the WebEDI System, resulting in an impressive 80% reduction in label sticker generation time and file size.
- Achieved a 50% boost in the WebEDI System's data uploading and processing speed, improving overall efficiency.
- Collaborated closely with UI/UX designer to ensure responsive layouts.
- Engaged with end-users to gather and analyse system requirements, facilitating the delivery of tailored solutions.

Programmer | Priority Resources Sdn. Bhd.
Penang, On site | Apr 2016 — Dec 2017

- Collaborated with senior engineers to develop the Warehouse Management System, Purchase Order System, and Sales Order System using ASP.NET C# MVC and MsSQL, gaining valuable experience in modern web application development.
- Created UI mockups for the Warehouse Management System to ensure a user-friendly and visually appealing interface.
- Produced clean and reusable code to promote code maintainability and improve long-term project sustainability.

Education

Bachelor of Information System | Wawasan Open University
Graduated: Dec 2019
CGPA 3.85

Diploma in Business Information System | Tunku Abdul Rahman University College (TARUC)
Graduated: May 2014
CGPA 3.90
